

PASSIER®

Snaffle Bridle and Double Bridle Fit

■ Measurement A: „From bit ring to bit ring“:

Step 1: Please measure over the head from one corner of the mouth to the other.

Schritt 2: Subtract the diameter of the two bit rings from the measurement obtained.

Attention: The measuring is best done with somebody helping you. Do not measure over the bridle or halter.

Diameter bit rings:

Regular bit ring: 7 cm (2.75"), subtract 14 cm (5.5")

Small bit ring: 5,5 cm (2.15"), subtract 11 cm (4.3")

D-ring/eggbut bit: 6,5 cm (2.5"), subtract 13 cm (5")

■ Measurement B: „Nose circumference Flash Noseband and Passier Caveson Special“:

Please measure where the Flash Noseband and Passier Caveson Special are positioned, i.e. approx. 2 cm (0.8")/ 2 fingers below the cheekbone.

■ Measurement C: „Nose circumference Dropped Noseband“:

Measure where the Dropped Noseband is positioned, i.e. approx. 4 cm (1.5")/4 fingers above the edge of the nostril.

■ Measurement D: „From cheekbone to cheekbone“:

Please measure between cheekbones.
